Just changed all the brake pads on the car J11 on the drive, took 1.5 hours (wasn't rushing and it was raining)
 You DONT need any special tools even for the rear electric hand brake all you need is a torx bit to wind back the piston clock wise, you just have to unbolt the electric gearbox on the calliper.
 this is a job ANY one can do i can't emphasise how easy a job it is, the hardest part is jacking up the car and taking the wheels off !!! whole job cost me £46 for the pads.

Must be the day for it as I've just done Discs and Pads on the front of my J10 took about 1.5hrs too, easiest disc and pads I've done on any car!
 I don't know how Nissan get away with the prices they charge!

2013 QQ 360 1.5 dci
